Dive into one of the most vibrating Life Science Ecosystems in Europe!

Be part of the BioRN Annual Conference (BAC) 2024 - where expertise from basic, applied and clinical research will be shared and new perspectives and visions will be introduced. Renowned speakers will present their latest results and are at the heart of the BAC. In addition young scientists will present their cutting edge research in the "Young Scientists Pitch Competition". The conference will be complemented by an exhibition area where companies and institutions present their latest technologies and products.

Thanks to groundbreaking technological advancements, radiopharmaceuticals and antibody drug conjugates have once more opened up remarkable capabilities towards clinical development. In addition, new insights in epigenetics, RNA biology, and molecular glues have unveiled avenues for other novel therapeutic modalities holding great promise for individual treatments.

The BioRN Annual Conference will bring together expertise in basic, applied and clinical research in these fields, fostering new perspectives and visions for personalised medicine.
