About the Trinational health tech days:

Organised by the BadenCampus and its partners from the University of Basel, the Life Science Accelerator Baden-Württemberg and Quest for health, the 'Trinational HealthTech Days #5' business event aims to connect innovative startups and the ecosystems from France, Germany and Switzerland to promote international cooperation in the health technology sector (biotech, medtech, digital health) with a dual challenge:

- A better understanding of how corporates work together with startups to improve their chances of success.
- The opportunity to network with international startups and connect with funds, VCs and corporate investors.
